1. Claims have been renumbered as shown below:

- Claims 1 – 2 are not renumbered
- Claim 4 is renumbered as claim 5
- Claims 5 - 6 have been renumbered as claims 3 - 4 respectively.
- Claim 7 is renumbered as claim 6

### ***Response to Amendment***

2. Applicant's amendment filed 8/16/2007 has been fully considered and as a result claims 1 – 2, 4 – 7 are now allowed.

### ***Reasons for Allowance***

3. The prior art of record, including Tsimbinos, Kim, D'Andrea, Kerth fail to teach or suggest:

amplitude impulse response accumulation adding means for outputting an accumulation adding value of multiplication values obtained by multiplying the signal voltage value after quadrature modulation by impulse response values corresponding to amplitude characteristic of the power amplifier in accordance with the voltage value data from the signal voltage value data outputting means and supplying to the subtractor means;

Art Unit: 2611

wherein said amplitude impulse response accumulation adding means comprises:

N of first table blocks each having a first table storing M of said multiplication values corresponding to each of said voltage value data and a first adder for adding M of said multiplication values outputted from said first table;

a delay block formed by serially connecting N-1 of delays for delaying the voltage value data outputted from said voltage value data output means by a predetermined time; and

a second adder for outputting said accumulation adding values obtained by adding respective output values from respective first adder in said N of first table blocks to said subtractor means, and N of points comprising input point of said delay at a first stage, each of connecting points among delays, and output point of said delay at final stage in the delay block are connected to each of input point in said N of first table block, and at least a part of the voltage value data outputted from said voltage value data output means is defined as address data for accessing each of said first table in said first table block, wherein said M and N are natural numbers.

4. Claims 1 – 2, 4 – 7 are allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2611

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
